JEEL PATEL

jeel20579@gmail.com | Clementon, NJ | linkedin.com/in/jeelpatel | github.com/JP05165

EDUCATION

Bachelor of Arts: Computing & Informatics **(anticipated December 2027)**
Minors in Computer Science & Cybersecurity
Rowan University, Glassboro, NJ
GPA: 4.0 | President's List: Fall 2024, Spring 2025, Fall 2025, Spring 2026

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript, HTML/CSS, Bash, Ruby
Frameworks & Tools: Flask, pandas, Chart.js, JWT, bcrypt, nmap, Git, GitHub, Linux, SQLite, VS Code
Cloud & Infrastructure: AWS S3, IAM, VPC, EC2, Internet Gateway, Route Tables, Security Groups, VPC Peering, Flow Logs
Security & SIEM: Splunk, Penetration Testing, Authentication/Authorization, Threat Detection, Log Analysis, Security Automation
Concepts: REST APIs, Cloud Security, Data Visualization, State Machines, Automation
Certifications: CompTIA A+ Certification (**anticipated May 2027)**
Languages Spoken: English, Gujarati, Hindi, Spanish

TECHNICAL PROJECTS & ADVANCED COURSEWORK

Bank Security Transactional System | Python, Flask, SQLite, JWT, Bash, Splunk **April 2026—June 2026**

- Engineered a full-stack banking API implementing JWT authentication, bcrypt hashing, and rate limiting to defend against brute-force and replay attacks; added idempotency keys and a fraud detection engine.
- Validated auth controls, rate limiting, and token security with automated Python/nmap penetration testing scripts, logging all results with timestamps for auditability.
- Wrote Bash automation with error handling for cron-scheduled log rotation, ensuring continuous audit trail integrity for security monitoring.
- Built a 4-panel Splunk SIEM dashboard visualizing authentication failures, rate limiting events, port scan results, and audit run timelines from live security logs.

AWS Cloud Infrastructure | Amazon S3, IAM, VPC, EC2 **August 2026**

- Hosted a static website on Amazon S3 with configured public access policies and bucket-level security controls.
- Configured AWS IAM users, groups, roles, and policies to implement least-privilege access controls and enforce cloud security best practices.
- Built a custom VPC from scratch across 9 hands-on labs, including public/private subnets, internet gateway, route tables, security groups, and NACLs.
- Configured VPC peering, flow logs for traffic monitoring, and VPC endpoints for private S3 access; validated end-to-end connectivity between resources.

Philadelphia Eagles NFL Analytics Dashboard | Python, Flask, Chart.js, pandas **July 2026**

- Built a web-based sports analytics dashboard covering all 32 NFL teams, with a Flask REST API serving dynamic per-team endpoints and live data via nfl_data_py.
- Designed Chart.js visualizations including per-game score breakdowns, win/loss charts, home vs. away comparisons, and season stat cards.

CompTIA CySA+ CertMaster Learn + Labs **January 2026—May 2026**

- Completed 100% of course content covering vulnerability response, threat intelligence, security operations, and incident response; 100% across all live labs.

OTHER EXPERIENCE

Part-Time Sales Associate | Columbia Sportswear, Blackwood, NJ **July 2024—Present**

- Assist customers daily with technical product guidance on performance outerwear, translating manufacturer specs (Omni-Heat, Omni-Tech) into purchase decisions.
- Exceed upsell and product recommendation targets while operating POS systems and enforcing loss prevention procedures.

Seasonal Sales Associate | Adidas, Blackwood, NJ **June 2023—August 2023**

- Spearheaded promotional initiatives during peak retail periods, surpassing seasonal revenue benchmarks through product demonstrations and customer engagement.
